PROFESSIONAL SUMMARY

Backend Python Developer with nearly 2 years of experience building production APIs (Django, DRF, FastAPI) and LLM-powered features. Shipped an AI interview platform (GPT-4o, Azure Speech, WebSockets) and built a RAG pipeline with FAISS and sentence-transformers. Strong in API design, MongoDB/PostgreSQL, and real-time systems.

WORK EXPERIENCE

Junior Software Engineer | Marktime Technology

Dec 2024 – Present

- Built and maintained REST APIs with Django and DRF for two AI products: an interview platform and a job-matching platform.
- Designed MongoDB schemas and indexes and optimized slow queries to reduce API response times.
- Implemented authentication flows, input validation, and consistent error handling across all endpoints.
- Integrated LLM and speech services (OpenAI GPT-4o, Azure Speech) into production backends, including prompt design.
- Worked in an Agile team with frontend and QA: sprint planning in JIRA, code reviews in Bitbucket.
- Recognized at Marktime Technology for backend API contributions and performance optimization.

PROJECTS

AI Interview Platform

- Built backend APIs (Django, DRF) for interview sessions, candidate flows, and real-time interactions.
- Integrated GPT-4o with engineered system and user prompts to generate interview questions.
- Implemented live interview sessions over Django WebSockets.
- Integrated Azure Speech-to-Text and Text-to-Speech for voice-based interviews.
- Modeled interview data in MongoDB; cut latency through query optimization and refactoring.

Vrit.ai – AI-Powered Job Platform

- Built APIs for job matching, resume upload, and automated candidate scoring using Python and DRF.
- Shipped new features, fixed production bugs, and integrated third-party APIs.
- Optimized database queries to reduce API response times.

RAG Pipeline – Free-Tier, Python

- Built an end-to-end RAG pipeline: PyMuPDF ingestion, sentence-aware chunking, and sentence-transformers embeddings (all-MiniLM-L6-v2).
- Stored vectors in a persistent FAISS index for similarity search; generated answers with Groq (llama3-70b-8192).
- Runs entirely on free tiers, with an interactive REPL for querying documents.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework (DRF), FastAPI, Celery, REST API design, authentication

Databases: MongoDB, PostgreSQL, Redis

AI / LLM: OpenAI GPT-4o, prompt engineering, RAG, FAISS, sentence-transformers, Groq API, Azure Speech Services

Real-Time: Django WebSockets

Tools: Docker, Git workflows, Postman, Bitbucket, JIRA, Claude Code, OpenAI Codex

EDUCATION

Bachelor of Arts in Geography

Jun 2022 – Jul 2025

Raj Rishi Bhartrihari Matsya University, Alwar
